SUMMARY

AWS Certified Data Engineer and AI/Data professional with 3+ years of experience building production ML models, RAG systems, agentic AI workflows, and scalable cloud data pipelines. Skilled in Python, AWS, Snowflake, Databricks, PySpark, DBT, LangChain, and OpenAI Agents SDK, delivering measurable improvements in model accuracy, data reliability, and operational efficiency.

PROFESSIONAL WORK EXPERIENCE

AI Engineer Intern | *NeuralSeek, USA (Remote)*

July 2025 – November 2025

- Led a 4-member team building LangChain RAG pipelines for 10K+ real estate documents, supporting 500+ daily queries.
- Improved document upload reliability by 30% using AWS Lambda, S3, DynamoDB, vector refresh, and MCP error alerts.
- Reduced UI/API iteration time by 25% with Codex-assisted FastAPI, Pydantic, pytest, logging, and error handling.
- Improved RAG answer quality through similarity threshold optimization, citation validation, response caching, fallback handling, and low-confidence query logging.
- Built an Agentic AI system with OpenAI Agents SDK to draft and evaluate reports, then create Gmail drafts through MCP-based tool use.

Data Scientist | *Whiterock Technologies, India*

March 2021 – July 2024

- Engineered and deployed ML models for manufacturing quality prediction using Python, Scikit-Learn, PySpark, SageMaker, and CloudWatch, improving defect detection accuracy by 22% and maintaining 98.8% pipeline uptime.
- Consolidated manufacturing data from multiple systems by managing 12 AWS-to-Snowflake ELT pipelines using Airflow and dbt, reducing data prep time by 45% and improving reporting speed by 40% for 200+ users.
- Optimized classification and regression models through feature selection and hyperparameter tuning, improving prediction precision across production and maintenance use cases by 17%.
- Constructed statistical analyses and visualization dashboards to measure process stability, enabling engineering teams to identify recurring operational trends and prioritize corrective actions more efficiently.
- Automated recurring analytics workflows with SQL, Pandas, and scheduled data pipelines, decreasing manual processing effort by 55% while improving reporting accuracy for manufacturing leadership.

PROJECTS

AgentShield | *Next.js, TypeScript, Groq, Gemini, Supabase, Prisma, Zod, Vitest, Playwright*

- Built a multi-LLM agent QA platform with 6 failure modes and 3 red-team scan levels for pre-launch AI agent testing.
- Automated prompt-injection, privacy leakage, unsafe tool-use, hallucination, and policy-risk evaluation with regression reports.

AI FinOps Copilot | *Next.js, TypeScript, Groq, Serverless APIs, Cloud Cost Analytics, Vercel*

- Built a read-only AI FinOps copilot analyzing 24 cloud resources across 5 teams, surfacing 15 savings findings and cost spikes.
- Generated owner-aware savings plans, executive summaries, and ticket-ready actions without requiring AWS credentials.

AI/ML Knowledge RAG Assistant | *Next.js, Supabase pgvector, Jina Embeddings, Groq, RAG, Vector Search*

- Built a cloud-native RAG assistant with Top-3 retrieval, 0.6 similarity gating, clickable citations, and refusal handling.
- Added exact cache, semantic cache, and embedding cache to reduce repeated LLM and embedding calls.

Databricks Lakeflow Medallion Pipeline | *AWS S3, Databricks, Lakeflow Jobs, Unity Catalog, PySpark, Spark SQL*

- Built an S3-to-Databricks pipeline processing FMCG data through Bronze, Silver, and Gold layers with full and incremental loads.
- Created governed gold tables for SQL analytics, dashboards, parent-company reporting, and Databricks Genie exploration.

Airbnb Snowflake dbt Pipeline | *AWS S3, Snowflake, dbt, SQL, Jinja*

- Built an end-to-end Airbnb analytics pipeline transforming bookings, hosts, and listings data into BI-ready models.
- Implemented incremental models, SCD Type 2, dbt tests, macros, lineage documentation, fact tables, and OBT models.

EDUCATION

Master of Science in Information Technology & Management | *Illinois Institute of Technology* | USA

May 2026

Bachelor of Computer Science | *Visvesvaraya Technological University* | India

August 2023

SKILLS

Programming: Python, SQL, PySpark, R

Machine Learning: Supervised & Unsupervised Learning, Feature Engineering, Model Optimization, Classification, Regression, Clustering, Time Series Forecasting, Recommendation Systems, Anomaly Detection

Generative AI: Large Language Models (LLMs), RAG, Hugging Face, Transformers, Prompt Engineering, Embedding Models, LangChain

Deep Learning: TensorFlow, PyTorch, Scikit Learn, XGBoost, LightGBM

Data Engineering: Apache Spark, Pandas, NumPy, ETL Pipelines, Kafka, Flink, Data Processing, Streaming Data Pipelines, Data Quality

MLOps & Deployment: MLflow, Docker, Kubernetes, FastAPI, Model Serving, Model Monitoring, CI/CD

Cloud & Data Platforms: AWS (S3, Glue, SageMaker, EC2, RedShift, CloudWatch, Lambda), Azure, Databricks, Snowflake, BigQuery, Grafana

Visualization & Analytics: Power BI, Tableau, Matplotlib, Plotly, Statistical Analysis, A/B Testing

Databases & Tools: PostgreSQL, SQL Server, MySQL, MongoDB, Git, Linux, Jira, Confluence, REST APIs, Agile, Scrum
